**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 7 is an apparatus claim which includes no means or structure to perform the functions of claim 1, said structure is found in claims 8 or 9.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Reid(JOQE, 11/1999).

With regard to claim 1, Reid teaches a method for measuring an optical pulse comprising:

(a) filtering an optical pulse to obtain a frequency-filtered pulse, a transfer function for said frequency filtering being given, see section I. introduction;

Art Unit: 2877

(b) measuring a sonogram , which is defined as the intensity waveform of said frequency-filtered pulse, to obtain a measured sonogram, by cross correlation see section I. introduction; and

(c) reconstructing said optical pulse by using said measured sonogram and said transfer function by algorithm see section II. sonogram pulse retrieval algorithm.

With regard to claim 2, Reid teaches an optical pulse to be measured and a sampling pulse for cross-correlation with said optical pulse, see section I. introduction.

With regard to claim 7, Reid teaches an optical sampling system, see section I. introduction.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reid(JOQE, 11/1999) in view of Cohen(proceedings IEEE, 7/1989).

While Reid teaches a reconstruction algorithm the specific predetermined formula of claims 4 and 5 is not disclosed. With regard to claim 6, see figure 2 for steps a-c.

Cohen teaches method for deriving a plurality of reconstruction algorithms including those found in claims 4 and 5, see page 4 of the specification.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Reid method by use of any retrieval algorithm which can be derived from the teachings of Cohen for the pulse retrieval algorithm of Reid-figure 2.

#### ***Allowable Subject Matter***

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 8-11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

#### ***Relevant Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Debeau et al(6,160,626) see figure 2, and Weiner et al(JOSA B. 8/1988).
